

## REMOTE ACCESS FROM A GOOGLE CHROMEBOOK v002 02/10/14

1. At present a Google Chromebook is unable to use "Remote Access" because as far as we are aware there is not a working App available.

Note: There are many Free Apps available supporting "Microsoft Remote Desktop" or (RDP), but these will not work with the Schools "Remote Access" unless they support "Microsoft Remote Desktop Server Gateway (RDS Gateway) 2008 R2.
